<b>IaaS: Amazon Web Services (AWS) – All Services in all US Regions &amp; GovCloud</b>					
<p>Amazon Web Services (AWS) is a comprehensive cloud services platform that offers compute power, storage, content delivery, and growing list of remote computing and web services that organizations can use to deploy applications and services cost-effectively — with pay as you go flexibility, scalability, and reliability.</p> <p>AWS is located in 4+ geographical "regions" in continental United States: US East (northern Virginia), U.S. West (northern California), U.S. West (Oregon), and GovCloud. Each Region has multiple "Availability Zones", which are distinct data centers providing AWS services. Availability Zones are isolated from each other to prevent outages from spreading between Zones. Several services operate across Availability Zones (e.g., S3, DynamoDB) while others can be configured to replicate across Zones to spread demand and avoid downtime from failures.</p> <p>AWS GovCloud (US) is an isolated AWS Region designed to allow US government agencies and customers to move sensitive workloads into the cloud by addressing their specific regulatory and compliance requirements. The AWS GovCloud (US) framework adheres to U.S. International Traffic in Arms Regulations (ITAR) regulations as well as the Federal Risk and Authorization Management Program (FedRAMP) requirements.</p>					
<b>Amazon Web Services – US Regions &amp; GovCloud</b>					
<p>Amazon EC2, S3, Route 53, CloudFront, RDS, DynamoDB, Elastic Cache, CloudWatch, SES, SNS, Elastic Transcoder, Workspaces, WorkDocs, Directory Services, RedShift, Clacier, SQS, SWF, Elastic MapSource, CCloudSearch, Direct Connect, VPC, SimpleSB</p>					
<p>AWS published MSRP Calculator is available online at: <a href="http://calculator.s3.amazonaws.com/index.html">http://calculator.s3.amazonaws.com/index.html</a></p>					
<p>Avosys will provide customers with AWS MSRP on all SOWs</p>					
<b>AWS Support Packages</b>					
<b>Avosys Premium Support Package</b>		15% of total AWS spend (pre-discounted AWS spend)			
	Total AWS Spend Workloads - Low Workload Sample	Monthly	\$1,000.00	+15.00%	\$150.00
	Total AWS Spend Workloads - Medium Workload Sample	Monthly	\$10,000.00	+15.00%	\$1,500.00
	Total AWS Spend Workloads - High Workload Sample	Monthly	\$25,000.00	+15.00%	\$3,750.00

## Avosys Platform as a Services - ManagedCube Services

**Avosys Platform as a Services is a collection of Managed Platform Software Solutions, including Managed Hosting, Managed IT Services and related Technical Services (collectively, “ManagedCube” Services) built on top of inter-connected, highly available computing, storage, networking, security and bandwidth components of leading IaaS, PaaS cloud service providers, such as Amazon Web Services, Microsoft Windows Azure and partnered data centers. \*Note: Microsoft Azure must be purchased through an authorized Microsoft reseller.**

**Avosys PaaS pricing package is built upon customers choice of the following variables:**

**Host Location:** Avosys has pre-built host locations to deliver its ManagedCube services providing customer the choice of hosting their integrated workloads at Amazon Web Services (AWS), Microsoft Windows Azure or partnered data centers in Texas in Austin, Dallas, Houston and San Antonio.

**Platform Solution:** is the core solution being delivered as Managed Platform Service. Avosys continues to expand its portfolio PaaS offerings. Growing list for platform solutions include:

- Director and Networking Services (AD, Group Policies, DHCP, DNS)
- Remote Access Gateway Services (RDP, SSL-VPN)
- Remote Hosted Applications (Microsoft RDP, Citrix XenApps)
- Identity and Access Services (Single Signon, Dual Factor Authentication, AAA)
- Managed IT Services (Monitoring, Backup, Antivirus, Patch Management)
- Security, Audit and Compliance Support Services
- Data Encryption at Rest Management Services
- System Center Services (Config, VMM, Backup, Operations)
- Certificate Key Management Services
- High Availability Services (DR, Multi-Zone Regions, Replications)
- Scalability Services (Load Balancers, On-Demand Scaling)

**Platform Components:** Core IaaS components on which the platform solution is built. Options for platform include:

- Managed Cloud Servers
- Managed Cloud Storage
- Managed Cloud Backup
- Managed Cloud Desktops
- Managed Cloud Databases
- Managed Cloud Security: Firewall, VPN, Gateways
- Managed Cloud Availability: Load Balancers, Monitoring
- Managed Cloud DR: Replication, Archive, Zones, Regions

**Software Product:** Vendor software product on which the platform solution is built. Avosys continues to expand its supported vendor lists to enhance its ManagedCube PaaS offerings. Growing list of vendor options include:

- Microsoft
- SecureAuth
- SafeNet, Inc.
- Xceedium
- TrendMicro

**Deployment Type:** Customer is given the choice of deploying their workloads interconnected with Avosys PaaS from managed Multi-Tenant environment. Options include:

Shared Deployment - for turnkey fully managed customer workloads, managed by Avosys delivered from a shared Multi-Tenant environment.

Hybrid Deployment - for hybrid co-managed customer workloads deployed in customer's dedicated firewalled zone, securely interconnected with ManagedCube zone to access Avosys PaaS services. Customer is allowed access to their dedicated servers deployed in their dedicated zone while Avosys PaaS services are managed by Avosys.

Dedicated Deployment - for highly secure isolated deployments where both customer workloads and PaaS services is created for dedicated use for the customer. Customer and Avosys co-manage PaaS as a shared responsibility.

Customer Premise - for cloud workloads interconnected with customer premise, requiring continuity and consumption of certain Avosys PaaS services. A dedicated deployment in cloud is required to provide Avosys PaaS interconnected with workloads located at customer premise.

**License Type:** used for all software components involved in the PaaS solution from host operating system to platform software. Options include:

- Subscription - Per User
- Subscription - Per Processor or server instance
- Enterprise License
- Site License
- Demo or Proof of concept temporary licenses

**Environment Type:** solution use case intended for cloud workload(s), including number of operating environments required. Options include:

- Demo or Proof of concept
- Test and Development
- Production - Internal users
- Production - Internal and External users
- High Availability

**Contract Length:** The number of months or years PaaS will be used.

**ManagedCube Platform: Microsoft Subscriptions SPLA & License Only (no management or maintenance)**

Microsoft subscription software available as part of Microsoft Service Provider License Agreement (SPLA) for custom PaaS application workload bundled solutions. SPLA licensing is not a stand-alone offering through this contract. Licensing provided is bundled with the subscription of custom application hosting services provided. Options include:

**Licensing Type:**  
 User Subscription Access License (SAL) per month  
 Per vCPU or processor Core per hosted server

**Operating Systems:**  
 Windows Essential Server  
 Windows Standard Server  
 Windows Data Center Server

**Microsoft Application Software:**  
 Application Virtualization SAL  
 BizTalk Server SAL: Branch, Standard, Enterprise  
 Dynamix AX Hosted SAL  
 Exchange SAL: Basic, Standard, Enterprise, Enterprise Plus  
 Forefront Endpoint Protection SAL  
 Forefront Identity Manager SAL  
 Lync SAL: Standard, Plus, Enterprise  
 Office SAL: Standard, ProPlus  
 Project SAL: Standard, Pro  
 Sharepoint SAL: Standard, Enterprise  
 SQL SAL: Web, Standard, Enterprise  
 System Center SAL: Client Mgmt. Suite, Standard, Config Manager, Data Center  
 Visio SAL: Standard, Pro  
 Windows Remote Desktop Services SAL  
 Windows Rights Management Services SAL

	Xceedium Technical Services (1day)	per day	2.00%	\$2,000.00	\$1,960.00
<b>Xceedium Pricing Policies &amp; Restriction</b>					

	1. One Foundation Software license is required per customer (and does not include any Node or AWS Console User licenses). *Note that Special Software Bundles include a Foundation Software license.				
	2. Xsuite Cloud AMI configurations are annual term subscriptions only. The Annual Term Subscription price is calculated by the addition of all licensed components in the Annual Term column (Xsuite for AWS Appliance, AWS Console User Licenses, Node Licenses).				
	3. Minimum configuration for Xsuite Cloud requires Xsuite Cloud Foundation Software license plus 10 User License for AWS Console plus 50 Xnode License (except for Special 5 User, 25 Xnode Bundle – See Xceedium Special Bundles section)				
	4. Adding Nodes or AWS Console Users to an Annual Term Subscription license can be done at any time, but requires the Subscription be extended for a year from the time of additional purchase. Node/User counts can only be reduced at the beginning of a new annual term.				
	5. Only Xnodes can be used to manage Instances in AWS EC2 (meaning all nodes in AWS EC2 require both a GK Node and a PA Node).				
	6. Node licenses must be licensed/subscribed for inpacks of 25				
	7. Separate clusters require separate Node licenses (even if they access the same devices).				
	8. Volume discount tier for Node Licenses is determined by adding the total number of nodes (of any type) purchased to date to the number of nodes being purchased in current transaction.

**Avosys Training, Setup, Support and Technical Services**

Avosys Technology offers Architecture, Proof of Concepts, Engineering, Deployment, Security, Project Management and on-going Management and Operational technical support services for its Cloud Infrastructure (IaaS), Cloud Platform (PaaS) and Avosys Platform (PaaS) Services. Setup and Migration services are offered at a discounted hourly rate or as a discounted solution bundle.

Tier 1 Helpdesk support is available for Avosys PaaS services at no additional charge. For enhanced services, cloud technical support retainer packages are available for Cloud IaaS, Cloud PaaS and Avosys PaaS Services. Cloud Technical Services may be purchased with or without IaaS or PaaS Cloud Service offerings. Support Retainers are offered at up to 10 percent discount off MSRP. For IT and Cloud technical services requiring dedicated full time personnel staffed at government site, Cloud Technical Services Labor Categories are available at discounted price.
